

Exhibit 7.2.f.

Operations Report
January 2008

1. Meeting with Ed Steward regarding processing of work orders and having our custodians check out the problem to see if it is within our ability and contract to repair before going to the city. This should help reduce the number of work orders that go to the city regularly in the upcoming year.
2. Radon testing is being done the week of Jan. 14th. as required by state law. Letters were sent to all parents and staff informing them of this.
3. I will meet with Mr. Goodrich to review the RFP that will go out soon for replacement of furniture in the NLHS lecture hall. This was budgeted for this year.
4. As requested, a meeting has been set up to review NLHS needs for the accreditation process with Public Works.
5. Custodians cleaned as thoroughly as possible during the vacation week.
6. Sand has been replaced at buildings so we are prepared for any further storms.
